INDEX

A

AET as radioprotective agent at cellular level, 125.
Abalone blood, hemocyanin concentration in, 459.
Achromatic figure of Chaetopterus egg, effects of podophyllin on, 369.
Acoustic orientation of Chilonycteris, 297.
Actyostelium, phototaxis in, 51.
Adaptation to salinity changes in toads, 218.
Adipohemocytes of boll weevil, 112.
ADKISSON, P. L. See C. M. WILLIAMS, 497.
After-effect, duration of, in planarian orientation, 347.
Aggregation of cells in Dictyosteliaceae, influence of light on time of, 392.
Alepisaurus, new digenetic trematode from stomach of, 488.
Algae, marine, phosphatases of, 271.
Algae and hydra, symbiosis between, 415.
ALLEN, G. See R. E. MCLAUGHLIN, 112.
Ambulacral pores of sand dollar, variations in, 401.
Ambystoma egg-jellies, relationship of antigenic components of, 328.
Amebocyte production in Strongylocentrotus, 259.
Amebocytes in holothurian coelomic fluid, 102.
Amebocytes of oyster, circulation of, 198.
Amino acids, role of in intracellular osmoregulation in toads, 218.
Amino acids of Scoloplos egg-jelly, 189.
Amphibian development, role of creatine and its phosphate in, 230.
Amphibian egg-jellies, relationship of antigenic components of, 328.
Anaerobiosis, effect of on frog embryos, 230.
Anatomical basis for stabilization of visual fields, 285.
Anatomy of developing Fundulus embryos, 143.
ANDERSON. J. M. Studies on visceral regeneration in sea-stars. II., 1.
Angle sense in orientation of millipede, 33.
Annelid (Polydora), larval development of, 356.
Annelid (Streblospio), development of, 67.
Annelid eggs, effects of podophyllin on, 369.
Annelid worm, egg cocoons of, 189.
Antheraea brain, transmission of photoperiodic signals to, 497.
Anthonomus, hemocytes of, 112.
Antigenic components of amphibian eggs, relationships of, 328.
Antimitotic agent, effect of on Chaetopterus eggs, 369.
Aplysia, chemosensory bases of food-finding in, 211.
Aposymbiotic hydra, effect of environmental agents on growth of, 415.
Arbacia eggs, method for studying chromosomes of, 169.
Arbacia eggs, radioprotective action of AET for, 125.
Arbacia fertilizin antigens, relationships of, 328.
ARMSTRONG, P. B., AND J. S. CHILD. Stages in the normal development of Fundulus, 143.
ARNOLD, J. M. Normal embryonic stages of the squid, Loligo, 24.
Arthropod eye, pigment migration and light adaptation in, 473.
Asterias, reaction of to foreign tissue in coelom, 77.
Asteriidae, visceral regeneration in, 1.
AUCLAIR, W. The chromosomes of sea urchins, especially Arbacia; a method for studying unsectioned eggs at first cleavage, 169.
Autoradiographic study of relation between hemocytes and connective tissues in Galleria, 337.
Autoradiographic study of sea urchin coelomocyte production, 259.
Autoradiography of Asterias and Patiria with foreign tissues in coelom, 77.
Autoradiography of regenerating starfish caeca, 1.
Autoradiography of sea urchin gametogenesis, 241.

B

Bacillariophyceae, phosphatase production by, 271.
BARNWELL, F. H. An angle sense in the orientation of a millipede, 33.

Autoradiographic study of relation between hemocytes and connective tissues in Galleria, 337.
Autoradiographic study of sea urchin coelomocyte production, 259.
Autoradiography of Asterias and Patiria with foreign tissues in coelom, 77.
Autoradiography of regenerating starfish caeca, 1.
Autoradiography of sea urchin gametogenesis, 241.

B

Bacillariophyceae, phosphatase production by, 271.
BARNWELL, F. H. An angle sense in the orientation of a millipede, 33.

Bat, echolocation of flying insects by, 297.
Beck, S. D., I. B. Colvin and D. E. Swinton. Photoperiodic control of a physiological rhythm, 177.
Behavior of Chilonycteris, during pursuit of flying insects, 297.
Bleeding of oysters, effect of on leucocyte counts, 198.
Blood of Haliotis, concentration of hemocyanin in, 459.
Blue crab, variability in larval stages of, 58.
Blue light, as photoperiodic signal to Antheraea brain, 497.
Body coloration, in relation to heat tolerance of Uca, 133.
Boll weevil, hemocytes of, 112.
Bonner, J. T., and F. E. Whitfield. The relation of sorocarp size to phototaxis in the cellular slime mold, Dictyostelium, 51.
Botulus, new trematode species of, from lancetfish stomach, 488.
Brachyuran crab, variability in larval stages of, 58.
Brain of Antheraea, transmission of photoperiodic signals to, 497.
Breeding season of Mya, 315.
Breeding season of Scoloplos, 189.
Breeding season of Streblospio, 67.
Breeding season of Strongylocentrotus, 241.
Brown, F. A., Jr., and Y. H. Park. Duration of an after-effect in planarians following a reversed horizontal magnetic vector, 347.
Brown, S. C. See W. R. Hunter, 508.
Brown bodies, formation of in holothurians, 102.
Bufo, intracellular osmoregulation during salinity adaptation in, 218.
Bufo egg-jellies, relationship of antigenic components of, 328.

C

Calcium, role of in growth of symbiotic and aposymbiotic hydra, 415.
Callinectes, variability in larval stages of, 58.
Cell aggregation in Dictyosteliaceae, influence of light on, 392.
Cell division, effects of podophyllin on, 369.
Cell size in Dictyostelium, relation of to phototaxis, 51.
Cells in coelomic fluid of holothurians, 102.
Cellular slime mold, phototaxis in, 51.
Cephalopod, embryology of, 24.
Cephalopods, stabilization of visual field in, 285.
Chaetopleura, relation of gill number to size in, 508.
Chaetopterus eggs, effects of podophyllin on, 369.
Chapman, G. The egg cocoons of Scoloplos, 189.
Chemosensory bases of feeding in Aplysia, 211.
Child, J. S. See P. B. Armstrong, 143.
Chilonycteris, echolocation of flying insects by, 297.
Chitons, relation of gill number and size in, 508.
Chlorohydra, symbiosis of with algae, 415.
Chromosomes of Arbacia, method for studying, 169.
Chromosomes of Chaetopterus, effects of podophyllin on, 369.
Chronology of development in Fundulus, 143.
Chronology of development in Loligo, 24.
Chrysophyceae, phosphatases in, 271.
Circulation of leucocytes in oyster, 198.
Clam, soft-shell, reproductive cycle of, 315.
Cleavage in Chaetopterus eggs, effects of podophyllin on, 369.
Cleavage in Fundulus eggs, 143.
Cleavage in Loligo eggs, 24.
Cleaving Arbacia eggs, method for studying, 169.
"Clotting" of oyster blood, 198.
Coagulation process in boll weevil, 112.
Cocoons, egg, of Scoloplos, 189.
Coelenterate, effect of temperature on strobilation of, 493.
Coelenterate (Hydra), symbiosis of with algae, 415.
Coelomocyte production in Strongylocentrotus, 259.
Coelomocytes of holothurians, origin of, 102.
Colchicine-treated Arbacia eggs, method for studying, 169.
Cold, effect of on velocity of dinoflagellates, 90.
Cold, role of in circulation of oyster leucocytes, 198.
Cold, role of in diapause development in Ostrinia, 177.
Collar, P. A. See W. G. Hand, 90.
Coloration, body, with respect to heat tolerance of Uca, 133.
Commensal of hermit crab (Polydora), development of, 356.
Concentration of hemocyanin in Haliotis blood, 459.
Connective tissue and hemocytes of Galleria, relation between, 337.
Control, photoperiodic, of physiological rhythm, 177.
Colvin, I. B. See S. D. Beck, 177.
Compensatory cyclorotation of eye, 285.

Copper-containing protein in Haliotis blood, 459.
COSTELLO, D. P. See C. HENLEY, 369.
COSTLOW, J. D., JR. Variability in larval stages of the blue crab, Callinectes, 58.
Crab, variability in larval stages of, 58.
Crab, fiddler, heat tolerance of, 133.
Crab, larval development of commensal of, 356.
Crassostrea, heart beat and circulation of leucocytes in, 198.
Creatine and creatine phosphate, role of in amphibian development, 230.
Crustacean, heat tolerance of, 133.
Crustacean, variability in larval stages of, 58.
Crustaceans, stabilization of visual field in, 285.
Ctenidial number in chitons, 508.
Cucumaria, origin of coelomocytes in, 102.
Cycle, reproductive, of Mya in New England, 315.
Cyclorotation of eye, 285.
Cytological effects of podophyllin and podophyllotoxin on Chaetopterus eggs, 369.
Cytology of developing Arbacia eggs, 169.
Cytology of gametogenesis in Strongylocentrotus, 241.

D

DNA synthesis in Strongylocentrotus coelomocytes, 259.
DNA synthesis in Strongylocentrotus gonads, 241.
Dark, orientation of slime molds in, 51.
Dark, role of in diapause development in Ostrinia, 177.
Dark-adapted Galleria, eye, pigment migration in, 473.
Darkness, role of in cell aggregation of Dictyosteliaceae, 392.
DAVENPORT, D. See W. G. HAND, 90.
Day-length, role of in diapause development in Ostrinia, 177.
Day-length, role of in termination of diapause in Antheraea, 497.
DEAN, D. On the reproduction and larval development of Streblospio, 67.
Developing Arbacia eggs, method for studying cytology of, 169.
Developing Chaetopterus eggs, effects of podophyllin on, 369.
Developing mice, x-irradiation of, 425.
Development of amphibians, role of creatine and its phosphate in, 230.
Development of Fundulus, 143.
Development of Galleria hemocytes and connective tissue, 337.
Development of Polydora, 356.
Development of squid, 24.
Development of Streblospio, 67.
Diapause physiology of insect (XV), 497.
Dictyosteliaceae, influence of light on time of cell aggregation in, 392.
Dictyostelium, phototaxis in, 51.
Differentiation of hemocytes in Galleria, 337.
Digenetic trematode from lancetfish stomach, 488.
Dimensions of sand dollars, variations in, 401.
Dinoflagellates, effects of temperature and salinity on velocity of, 90.
Distribution of Polydora, 356.
Drosophila, echolocation of by Chilonycteris, 297.
Dugesia orientation, duration of after-effect in, 347.
Duration of after-effect in planarian orientation, 347.
Duration of mature life of x-irradiated mice, 425.

E

Echinarachnius, variations in dimensions and weights of, 401.
Echinoderm, coelomocyte production in, 259.
Echinoderm, reaction of to foreign tissue in coelom, 77.
Echinoderm coelomocytes, origin of, 102.
Echinoderm eggs, method for studying, 169.
Echinoderm eggs, radioprotective action of AET for, 125.
Echinoderm fertilizin antigens, relationships of, 328.
Echinoderm gametogenesis, autoradiographic study of, 241.
Echinoderms, visceral regeneration in, 1.
Echolocation of flying insects by bat, 297.
Ecology of dinoflagellates, as affected by their velocity, 90.
Effects of environmental cations on growth of symbiotic and aposymbiotic hydra, 415.
Effects of podophyllin on Chaetopterus eggs, 369.
Effects of temperature and salinity on velocity rates of dinoflagellates, 90.
Effects of temperature on strobilation of Mastigias, 493.
Effects of x-irradiation of mice on duration of mature life, 425.
Egg cocoons of Scoloplos, 189.
Egg-jellies of amphibian, relationships of antigenic components of, 328.
Eggs of Arbacia, method for studying chromosomes of, 169.

Eggs of Arbacia, radioprotective action of AET on, 125.
Eggs of Chaetopterus, effects of podophyllin on, 369.
Eggs of Fundulus, development of, 143.
Eggs of Loligo, development of, 24.
Eggs of Streblospio, development of, 67.
Electrophysiology of Galleria eye, 473.
Eleocyte production in Strongylocentrotus, 259.
Embryological development, role of x-radiation damage to mice in, 425.
Embryological development of Chaetopterus, effects of podophyllin on, 369.
Embryology of amphibians, role of creatine and its phosphate in, 230.
Embryology of Fundulus, 143.
Embryology of Polydora, 356.
Embryology of squid, stages in, 24.
Embryology of Streblospio, 67.
Embryos of Arbacia, method for studying, 169.
Endocrine functions in Antheraea, 497.
Endocrine functions in Ostrinia, 177.
Energy flux in Galleria eye, 473.
Energy metabolism of Rana embryos, 230.
Environmental agents, effect of on growth of symbiotic and aposymbiotic hydra, 415.
Environmental factors, role of in dimensions and weights of sand dollars, 401.
Enzyme activity of marine algae, 271.
Ephyrae of Mastigias, effect of temperature on time of appearance of, 493.
Eupagurus commensal, larval development of, 356.
Eupentacta, origin of coelomocytes in, 102.
Eye of Galleria, pigment migration and light-adaptation in, 473.
Eye movements in relation to stabilization of visual field, 285.

O

Oak silkworm brain, transmission of photoperiodic signals to, 497.

Oculomotor activity, in relation to stabilization of visual field, 285.
Oenocytoids of boll weevil, 112.
Oogenesis in Mya, 315.
Oogenesis in Strongylocentrotus, 241.
Optical properties of Antheraea cocoon and pupal pigment, 473.
Orientation, acoustic, of Chilonycteris, 297.
Orientation of planarians, duration of after-effect in, 347.
Orientation sense of millipede, 33.
Orientation of slime molds towards light, 51.
Orientation of visual organs, 285.
Origin of holothurian coelomocytes, 102.
Osmoregulation during salinity adaptation in toads, 218.
Ova of amphibian, antigenic components of jellies of, 328.
Ova of Arbacia, method for studying chromosomes of, 169.
Ova of Arbacia, radioprotective action of AET on, 125.
Ova of Chaetopterus, effects of podophyllin on, 369.
Ova of Loligo, development of, 24.
Ova of Streblospio, development of, 67.
Oyster, heart rate and circulation of leucocytes in, 198.

P

Parabiotic twins of Galleria, use of in studying relation between hemocytes and connective tissue, 337.
Parastichopus, origin of coelomocytes in, 102.
Park, Y. H. See F. A. Brown, Jr., 347.
Patiria, reaction of to foreign tissue in coelom, 77.
Pernyi silkworm larvae, transmission of photoperiodic signals to brain of, 497.
Perras, J. P. See E. J. Kuenzler, 271.
pH optima for phosphatase production by marine algae, 271.
Phagocytes of oysters, circulation of, 198.
Phagocytes of Strongylocentrotus, 241.
Phagocytosis in boll weevil larvae, 112.
Phillips, J. H., Jr. See N. D. Holland, 259.
Phosphatases of marine algae, 271.
Phosphorus metabolism in amphibian embryos, 230.
Photoperiodic control of physiological rhythm, 177.
Photoperiodic stimuli, transmission of to brain of Antheraea larvae, 497.
Photoreceptors of Galleria eye, physiology of, 473.
Phototaxis, relation of sorocarp size to, in Dictyostelium, 51.
Phyletic significance of gill number in chitons, 508.
Physiological rhythm, photoperiodic control of, 177.
Physiology of insect diapause, XV., 497.
Pigment of Antheraea larval brain, role of in transmission of photoperiodic signal, 497.
Pigment migration in Galleria eye, 473.
Pilson, M. E. Q. Variation in hemocyanin concentration in the blood of four species of Haliotis, 459.
Pisaster, visceral regeneration in, 1.
Planarian orientation, duration of after-effect in, 347.
Planktonic larvae of Polydora, 356.
Plasma osmotic concentration in toads, 218.
Plasmatocytes of boll weevil, 112.
Podophyllin and podophyllotoxin, effects of on Chaetopterus eggs, 369.
Polychaete, egg cocoons of, 189.
Polychaete (Streblospio), development of, 67.
Polychaete annelid, larval development of, 356.
Polydora, development of, 356.
Polysphondylium, influence of light on time of cell aggregation in, 392.
Polysphondylium, phototaxis in, 51.
Populations of Mya, differences in breeding activity of, 315.
Post, C. T., Jr., and T. H. Goldsmith. Pigment migration and light-adaptation in the eye of the wax moth, Galleria, 473.
Potential, retinal action, of Galleria eye, 473.
Proctodone, photoperiodic control of secretion of, in Ostrinia, 177.
Prohemocytes of boll weevil, 112.
"Protective" effects of AET, 125.
Protein in blood of Haliotis, 459.
Protein content of marine algae, 271.
Protostelium, phototaxis in, 51.
Psolus, origin of coelomocytes in, 102.
Pulse-echo relations in pursuit of flying insects by Chilonycteris, 297.
Pyloric caeca of starfish, regeneration of, 1.

Q

Quercetin, tests of with Chaetopterus eggs, 369.

R

Radioprotective effects of AET, 125.
Rana egg-jellies, relationships of antigenic components of, 328.
Rana embryos, role of creatine and its phosphate in development of, 230.
Raper, K. B. See T. M. Konijn, 392.
Rate of heartbeat in oysters, 198.

Rates of swimming of dinoflagellates, effects of temperature and salinity on, 90.
Reactions of starfishes to foreign tissues in coelom, 77.
Regeneration, visceral, in sea stars, 1.
Relation of gill number to size in chitons, 508.
Relation between hemocytes and connective tissue in Galleria, 337.
Relation of sorocarp size to phototaxis in Dictyostelium, 51.
Relationship of antigenic components in egg-jellies of amphibians, 328.
Reproduction and development of Streblospio, 67.
Reproduction of Polydora, 356.
Reproductive cycle of Mya in New England, 315.
Reproductive cycle of Strongylocentrotus, 241.
Responses of planarians to weak magnetic fields, 347.
Retinal action potential of Galleria eye, 473.
Reverse-turning in millipede, 33.
Reversed horizontal magnetic vector, role of in orientation of planarians, 347.
"Rhinophores" of Aplysia, role of in food-finding, 211.
Rhizostome medusae, life-history of, 493.
Rhythm, physiological, photoperiodic control of, 177.
RICHARDS, A. G. See S. C. SHRIVASTAVA, 337.
Roentgen irradiation, effect of on mature life-span of mice, 425.
Role of creatine and its phosphate in amphibian development, 230.
ROPES, J. W., AND A. P. STICKNEY. Reproductive cycle of Mya in New England, 315.
RUGH, R., AND K. FU. AET as a radioprotective agent at the cellular level, 125.

S

Salinity, effects of on velocity of dinoflagellates, 90.
Salinity adaptation in toads, 218.
Sand dollar, variations in dimensions and weights of, 401.
Scoloplos, egg cocoons of, 189.
Sea-hare, food-finding in, 211.
Sea stars, visceral regeneration in, 1.
Sea urchin, coelomocyte production in, 259.
Sea urchin, gametogenesis in, 241.
Sea urchin egg fertilizin antigens, relationship of, 328.
Sea urchin eggs, method for studying, 169.
Sea urchin eggs, radioprotective effects of AET on, 125.
Seasonal changes in Strongylocentrotus gonads, 241.
Serology of amphibian egg-jellies, 328.
Sex cells of Strongylocentrotus, autoradiographic investigation of, 241.
Sex differences in radiation sensitivity of mice, 425.
Shape-changes in podophyllin-treated Chaetopterus eggs, 369.
SHIVERS, C. A. The relationship of antigenic components in egg-jellies of various amphibian species, 328.
SHRIVASTAVA, S. C., AND A. G. RICHARDS. An autoradiographic study of the relation between hemocytes and connective tissues in the wax moth, Galleria, 337.
Silkworm brain, transmission of photoperiodic signals to, 497.
Size in relation to gill number in chitons, 508.
Size of sorocarp, relation of to phototaxis, in Dictyostelium, 51.
Skeletal muscle, osmoregulation in, during salinity adaptation in toads, 218.
Slime mold, phototaxis in, 51.
Slime mold cell aggregation, influence of light on time of cell aggregation of, 392.
Sodium, role of in growth of symbiotic and aposymbiotic hydra, 415.
"Sonar" behavior of Chilonycteris, 297.
Sorocarp size, relation of to phototaxis in Dictyostelium, 51.
Spawning of Mya, 315.
Spawning of Scoloplos, 189.
Spawning season for Streblospio, 67.
Specificity of egg-jellies of amphibians, 328.
Spectral sensitivity of Antheraea pupal brain, 497.
Spermiogenesis in Mya, 315.
Spermiogenesis in Strongylocentrotus, 241.
Spherule cells of boll weevil, 112.
Squash method for studying Arbacia eggs, 169.
Squid, embryology of, 24.
Stabilization of visual fields, 285.
Stages in normal development of Fundulus, 143.
Stages in normal development of Loligo, 24.
Starfish, visceral regeneration in, 1.
Starfishes, reaction of to foreign tissue in coelom, 77.
STICKNEY, A. P. See J. W. ROPES, 315.
Stimuli, photoperiodic, transmission of to brain of Antheraea, 497.
Streblospio, reproduction and larval development of, 67.
Strobilation of Mastigias, effects of temperature on, 493.

Strongylocentrotus, coelomocyte production in, 259.
Strongylocentrotus, gametogenesis in, 241.
Studies on holothurian coelomocytes. II., 102.
STUNKARD, H. W. A digenetic trematode, Botulus, from the stomach of the lancetfish, Alepisaurus, taken in the South Pacific, 488.
SUGIURA, Y. On the life-history of rhizostome medusae. III., 493.
Swimming rate of dinoflagellates, effects of temperature and salinity on, 90.
SWINTON, D. E. See S. D. BECK, 177.
Symbiosis between hydra and algae, 415.
Symbiotic organisms, role of in strobilation of Mastigias, 493.
Syngamy in Arbacia eggs, 169.
Synthesis of phosphatase by marine algae, 271.

T

Taxonomy of Botulidae, 488.
Temperature, effects of on strobilation of Mastigias, 493.
Temperature, effects of on velocity of dinoflagellates, 90.
Temperature, role of in circulation of oyster leucocytes, 198.
Temperature, role of in diapause development in Ostrinia, 177.
Temperature tolerance of Uca, 133.
Test weight of sand dollars, variations in, 401.
Thermal tolerance of Uca, 133.
Thermoperiod, role of in diapause development in Ostrinia, 177.
Time of cell aggregation in Dictyosteliaceae, influence of light on, 392.
Tissue reactions in starfishes, 77.
Toads, intracellular osmoregulation during salinity adaptation in, 218.
Transmission of photoperiod signals to brain of Antheraea, 497.
Transplantation studies in starfishes, 77.
Trematode from lancetfish stomach, 488.
Trigoniulus, angle sense in orientation of, 33.
Trochophore of Polydora, 356.
Trochophore of Streblospio, 67.
Turning tendency in millipedes, 33.

U

Uca, heat tolerance of, 133.
Ulva as food for Aplysia, 211.

V

Variability in larval stages of Callinectes, 58.
Variability of leucocyte counts in oysters, 198.
Variation in hemocyanin concentration in Haliotis blood, 459.
Variations in dimensions of sand dollars, 401.
Velocity of dinoflagellates, effects of temperature and salinity on, 90.
Vertebrates, stabilization of visual field in, 285.
Visceral regeneration in sea-stars, 1.
Vision, role of in orientation of millipede, 33.
Visual field, stabilization of, 285.

W

WALCOTT, C. See C. M. WILLIAMS, 497.
Wax moth, pigment migration and light-adaptation in eye of, 473.
Wax moth, relation between hemocytes and connective tissue in, 337.
Weevil, hemocytes of, 112.
Weight of chitons, in relation to gill number, 508.
Weight of sand dollar, variations in, 401
WHITFIELD, F. E. See J. T. BONNER, 51.
WILKENS, J. L., AND M. FINGERMAN. Heat tolerance and temperature relationships of the fiddler crab, Uca, with reference to body coloration, 133.
WILLIAMS, C. M., P. D. ADKISSON AND C. WALCOTT. Physiology of insect diapause. XV., 497.

X

X-irradiation of mice, effects of on duration of life, 425.

Z

Zoeae of Callinectes, variability in, 58.
Zooxanthellae, role of in strobilation of Mastigias, 493.
